

HANDHELD FIBRE LASER MARKING MACHINE

Compact and flexible
Easy operation

High efficiency
High precision

PRODUCT DESCRIPTION

Compact and easy to use with a variety of applications

Desktop handheld laser coder is designed to solve various coding problems, using advanced laser technology to achieve fast focusing and high precision coding. Its highly integrated design makes the machine body compact and lightweight, greatly improving work efficiency.

The handheld laser equipment is more flexible and has a wide range of use, which is suitable for all kinds of metal materials such as iron, copper and aluminum, gold, silver, etc., and some non-metal materials such as PC, ABS, PVC, PC+ABS. Widely used in 3C, auto parts, electronic components, integrated circuits (PC), electrical appliances, precision instruments, hardware products, building materials, clocks and watches, jewellery and ornaments, crafts and gifts and other industries. It can meet the daily needs of customers. Equipped with high-quality laser and high-stability galvanometer system, the equipment has novel and beautiful style and diversified performance, which can easily cope with most common laser marking applications.

PRODUCT ADVANTAGE

- 100% portable: compact design, the whole machine is small and portable, can be used in different workstations or on-site.
- Cost-effective: powerful function, red fining by the use of space, can be operated continuously for 24 hours with high efficiency, improve production efficiency, save costs, stable performance and long service life.
- High-quality light source: advanced fibre laser, good actual beam quality, high stability, no consumables and maintenance-free, design life of about 100,000 working hours, can be flexibly applied to metal materials and some non-metal materials.
- Friendly operation page: the control software is powerful, supports multi-languages switching, easy to learn operation, supports text, pattern, two-dimensional code, bar code, running number, graphics and other content.

PRODUCT SIZE

Unit: (mm)

PRODUCT PARAMETERS

	Lasers	Fibre Optic Laser
	Power	20W
	Laser wavelength	1064nm
	Pulse frequency range	27–60KHz
	Confining space	1D, 2D, 3D (optional)
	Laser class	Class 4 laser products – IEC60825-1 compliant
	Marking direction	0–360°
	Marking area	Standard 110*110mm
	Scribing speed	Up to 20m/s
	Working distance	106±2mm
	Spot size	8mm
	Marking content	1D, 2D barcodes, logos, Chinese, English and numbers
	Operating system	Windows, iOS, Android
	Communication interface	USB, Mobile phone, WiFi
	Rated voltage	220V 50/60Hz
	Power of the whole machine	≤280W
	Weight	6kg
	Cooling method	Air cooling
	Protection class	IP55
	Environmental temperature	0°~40°
	Humidity range	Relative humidity <90%, non-condensing

STANDARD ACCESSORIES

● Lifting bracket

● Power cable

● Data cable

APPLICATION SCENARIO

Studios

Street stall economy

Outdoor activity

MARKING EFFECT
